

Pennants with bobblestitch letters

by Pysselofix – Helena Molinsky

Yarn: Scheepjes – Catona from Favoritgarner.se

Materials: One pennant weighs about 15g.

Hook: 2,5mm

Measure: The straight upper edge of the pennant is about 14,5 cm and from the top edge down to the tip it is 14 cm.

- Do you use any other yarn, use a smaller hook than recommended, to get better stability in the pennant.
- When you usually crochet with bobblestitch the bubbles are only made every two rows, and then only single crochets are made on the other row. To get the letters even, I have chosen to make some of them with bubbles from the backside too. Think of pulling together and popping out the bubble in the other direction as you make those letters.
- In the chart, the white boxes are a single crochet and the black boxes a bobblestitch.
- The pennants are crocheted from the bottom and up, starting at the tip. Also the letters are made from the bottom, starting in the lower right corner of the charts.
